

## USA Weightlifting 2010 Qualifying Total Calculations

### 1. Individual Championships: Nationals, National Juniors, National Collegiate Championships

The overall philosophy behind the suggested qualifying totals for these events is to foster more participation, helping to grow our base of national level lifters, and help make our national events more attractive to organizations for bidding/hosting, and sponsorship.

For these events the following method was used to establish the suggested totals:

- Average participation per weight class was established by using the 3 previous year's events.
- If a weight class yielded an average of 2-4 entries, totals were lowered 4-6%;
- If a weight class yielded an average 5-7 entries, totals were lowered 2-4%;
- If a weight class yielded an average of 8-10 entries, totals were lowered 1-3%;
- Finally, if a weight class yielded 11-13 average participants, totals remained unchanged, or were lowered 1%;

### 2. 2010 Youth Olympic Games

A system which is similar to our current method of selecting team members for “International Games”; Olympics, Youth Olympics, and Pan Am Games, where NO team points are awarded and performance is strictly individual is proposed. Therefore, team members will be selected strictly on percentage of qualifying total and not ability to score points.

To create the qualifying total we used the following method:

- Results of 2009 Youth World Championships were used as baseline numbers;
- After the top ranked athlete for each nation, any duplicates were eliminated;
- An average of 4<sup>th</sup> through 8<sup>th</sup> place totals of athletes remaining was used to create the average;
- The +63 and +85 kg totals were created using the same method as above, while combining results in order of 69 kg & +69 kg, and 94 kg & +94 kg. Highest total from each class respectively was used.

Women		Men	
Wt Class	Total	Wt Class	Total
48 KG	144.60	56 KG	222.60
53 KG	166.80	62 KG	247.20
58 KG	177.20	69 KG	261.00
63KG	189.40	77 KG	281.00
63+KG	205.60	85 KG	289.80
		85+ KG	292.80

### **3. Team Scoring Competitions: Worlds, Junior Worlds, Pan American Championships, World University**

The idea behind the proposed methods for the following competitions is to establish a way to select teams based on ability to place and score points in events where Olympic and Pan American slots are awarded. This method is proposed for World Championships, Junior Worlds, Pan American Championships and World University Championships. (Although Junior Worlds and World University Championships do count towards scoring points for any other Games, the paradigm should be established with Junior and Collegiate athletes as they will be the base for future World and Pan Am Teams that will be in the important “scoring” competitions.) We believe this paradigm matches the High Performance Plan as well as USOC ideals.

#### **World Championships:**

- A 3 year average (06, 07, 08) of IWF yearly rankings, using only 1 athlete per country was used to create a list of totals from 1-25.
- Following the Primary World Championship Qualifying event, athletes will be ranked on our team according to where they would place.
- In the event of a tie (e.g. several athletes would place 12<sup>th</sup> in their weight class, their actual total will also be expressed as a percentage of the qualifying number for that place within the weight class. Which ever athlete has a higher percentage of the qualifying number in this case will be ranked higher.

### Junior World Championships

- An average of 3 years (09,08,07) of Junior World results was used to create a list of 1-25 for Junior World Championships;
- Because there were not 25 competitors each year, a 1 kg decrease (in red) was used to extrapolate results.
- Also, to make results “smoother” whenever a total was more than 10% lower than the total above it, it was automatically increase to a 10% difference.
- In the event of a tie, the same method as outlined above will be used.

### 2010 Continental Youth Olympic Qualifier

- An average of 2008 and 2009 U-17 Pan American Championships was used to create this chart;
- Rankings to 10<sup>th</sup> place were created;

- To more realistically smooth regressions for current USA youth results and rankings, especially amongst lighter athletes, 2 kgs was subtracted from women, and 3 kgs from men instead of the 1 kg used for the older competitors between places.
